

Measuring Guide for Scarves

Double-check your work—always measure twice to ensure accuracy.

Tools and Tips

- Steel tape measure — do not use cloth tape
- Pencil
- Round measurements to the nearest $\frac{1}{8}$ "

Scarves

Width:

- Width on a scarf is one full width of fabric; this is standard and does not have to be noted at time of order

Length:

- Measure width to be covered
- Measure the length you want the scarf to drop down on the left and right sides
- Add 18" to 30" if you plan to loop the scarf around the curtain rod or drop it in the center
- Add an additional 6" to 10" per side if you plan to puddle on the floor
- Add these figures together to get the approximate scarf ordered length
